

MEDICAL AND SURGICAL NOTES

NEW USE OF SULPHURIC ACID.—In experiments made by Dr. Pasteur, it has been proved that water containing 1 per cent of concentrated sulphuric acid possesses the property of destroying bacteria. Properly diluted, sulphuric acid is a valuable cooling and astringent remedy, and is used to acidify certain decoctions or infusions.

EFFECT OF ZINC ON DRINKING-WATER.—In Dr. Vena's paper on the effect of zinc on water, so much quoted and discussed, the evidence cited in so many instances, showing, however, a very decided balance in favor of the view that such water is considerably injurious to health. Among the most important investigations bearing upon this subject have been those under the direction of the French Government, resulting in the prohibition by the marine authorities of galvanized iron tanks on board French men-of-war.

EDUCATION OF DEAF-MUTES.—At the present time the number of deaf-mutes in the world is estimated to be from 700,000 to 800,000, and of these some 60 per cent are said to be born deaf, the others losing their hearing by different causes. In the care and education of this vast number about 400 institutions only are provided, containing less than 27,000 inmates of both sexes and employing some 2,000 teachers.
